TWD TECHNOLOGIES OPENS SARNIA OFFICE

SARNIA — TWD Technologies, a leading management engineering consulting company, today announced the opening of an office in Sarnia. TWD's Sarnia office will provide project management and engineering services to the local petro-chemical, chemical and refining industries.

“Sarnia is a natural fit for TWD,” said Scott Wilson, P.Eng., TWD Principal. “TWD is bringing to Sarnia the experience and expertise we have developed while working with major petro-chemical and refining companies in other Canadian market places.”

TWD Technologies is headquartered in Oakville, Ontario with offices in Fort McMurray and Edmonton, Alberta. TWD has a significant history in the refining and chemical industries providing services that include:

- risk management;
- engineering;
- project management and controls; and
- management consulting/concept development.

“Our team has a proven track record providing clients with effective business and technical solutions through exceptional levels of service, innovation and flexibility,” said Wilson. “We look forward to working with the many multinational firms in the Sarnia area.”

TWD will be hiring engineers, project managers and office staff for its new Sarnia location. Additional information regarding employment opportunities and services provided by TWD can be obtained by contacting Scott Wilson at 519-542-1988, ext 227.
